## PROJECT WORK

AI Meal Planning App | Backend Developer | [Repo](#)

An AI-powered meal planning app that provides personalized meal plans based on user preferences, dietary restrictions, and health goals.

2025

- Developed the backend API to manage user data, meal plans, and preferences using Ruby on Rails.
- Implemented Devise-JWT authentication for secure user login and session management.
- Integrated Nutritionix -- a third-party API to fetch recipe data and nutrition information.
- Integrated OpenAI for alternative meal suggestions, enhancing accuracy in dietary recommendations.
- Used Postgresql to design and optimize the database schema for meal tracking and user progress, ensuring smooth data management and scalability.
- Collaborated with frontend and AI integration members using Git for version control ensuring seamless integration and code collaboration across the project.

<b>Stock Trading App   Backend &amp; Frontend Developer (Admin)   <a href="#">Repo</a></b> <i>A Ruby on Rails stock trading application that allows users to track stock prices in real-time, view market trends, and execute buy and sell trades.</i>	2025
<ul style="list-style-type: none"> <li>• Developed the backend for the admin panel, managing user accounts, transactions, and system data.</li> <li>• Implemented administrative features for monitoring transactions, user activity, and managing platform settings.</li> <li>• Designed and developed the frontend using Tailwind for the login, registration, authentication system, and admin interface, creating intuitive dashboards and ensuring a smooth and secure user experience.</li> <li>• Ensured secure access and role-based permissions for admins using Devise for authentication and authorization.</li> <li>• Collaborated with my team member to ensure seamless data flow and functionality across both backend and frontend.</li> </ul>	
<b>Journal App   Backend Developer   <a href="#">Repo</a></b> <i>A Ruby on Rails application that allows users to create and organize tasks based on different categories.</i>	2025
<ul style="list-style-type: none"> <li>• Created a feature that lets users organize their tasks through different categories using Rails Associations, enabling full CRUD functionality (Create, Read, Update, Delete) for task management.</li> <li>• Utilized Devise gem to allow users to sign up, log in with their credentials, and sign out from the application.</li> <li>• Enabled users to check their tasks for the day and all the tasks for future references.</li> <li>• Tested requests and models using RSpec for effective development and CRUD validation.</li> </ul>	
<b>Bank + Budget App   Frontend Developer   <a href="#">Repo</a>   <a href="#">Live</a></b> <i>A React application that simulates a simple banking system with extended budgeting features for expense tracking.</i>	2025
<ul style="list-style-type: none"> <li>• Implemented deposits, withdrawals, and transfers with real-time balance updates.</li> <li>• Built the UI using React and Bootstrap and integrated React-Toastify for instant success and error notifications.</li> <li>• Added budgeting features for adding, listing, and deleting expenses.</li> <li>• Included expense validation for negative balances.</li> </ul>	
<b>Tic-Tac-Toe App   Frontend Developer   <a href="#">Repo</a>   <a href="#">Live</a></b> <i>A React application that simulates a simple banking system with extended budgeting features for expense tracking.</i>	2025
<ul style="list-style-type: none"> <li>• Built the game board using a 2D array to manage the state of moves.</li> <li>• Implemented move history with Previous/Next navigation and a reset function.</li> <li>• Developed game logic entirely with JavaScript, without external libraries.</li> </ul>	
<b>Real Estate Landing Page   Frontend Developer   <a href="#">Repo</a>   <a href="#">Live</a></b> <i>A responsive product landing page for a real estate website built with semantic HTML and custom CSS.</i>	2025
<ul style="list-style-type: none"> <li>• Designed and structured the layout using HTML and CSS, ensuring clean and maintainable code.</li> <li>• Implemented responsive sections with CSS media queries for property listings, features, and contact forms.</li> <li>• Added basic interactivity with JS Bootstrap for navigation and UI enhancements.</li> </ul>
